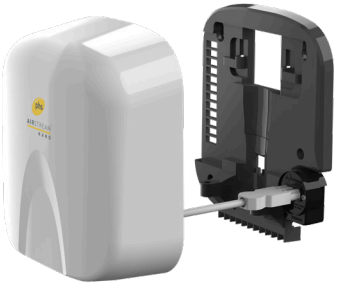
AIRSTREAM NANO®

Pure filtered warm air, in a small compact solution



Key Features :

- Fast dry time of less than 13 seconds
- Slim, light weight and compact design: 10cm deep (front of dryer to wall)
- Ideal for cubicle installation
- HEPA filter remove 99.9% of bacteria and viruses
- 500W energy efficient motor
- Full width air slot for fast and effective drying action
- Secure click-on design for easy install and maintenance
- Strong and durable ABS plastic cover
- Integrated noise control switch offers three custom modes

The **phs AIR**STREAM **NANO®** is our most compact and effective hand drying solution yet. It's slim, light weight, and boasts a modest 10cm deep design from wall to front of dryer. Making it the perfect hygienic cubicle companion for your business's washrom.

Designed with comfort in mind, the integrated noise control switch offers three custom modes, allowing the unit to adapt seamlessly to any setting

Fast Drying

With a fast dry time of less than 13 seconds the **phs AIR**STREAM **NANO®** is ideal for busy washrooms ensuring users hands are dried thoroughly and quickly helping to reduce washroom congestion.

Ambient air is filtered before being accelerated by the motor through a small heating element, raising the temperature for the user's comfort. The fast warm air is emitted from a wide thin aperture covering the hands for a speedy dry.

Hygienically Clean, Filtered Air

The **phs AIR**STREAM **NANO®** contains one High Efficiency Particulate Air (HEPA) filter which removes 99.9% of airborne particulates as small as 0.3 microns from the air that enters the dryer, including viruses, bacteria, mould, pollen, and other allergens.

Unique Connect Technology

phs connect is an innovative feature which allows the back plate to the main dryer unit. Once installed the dryer is easily, quickly, and securely locked onto the back plate.
