

AUTOSAN cistern sanitiser

> Hygiene with every flush

A cistern sanitiser that deodorises and destroys bacteria in urinals and toilets, helping to keep your washroom clean and hygienic.

Key Features

One system, two solutions - Toilets & Urinals

Flush-activated cleaning – Uses natural flush cycle for full coverage

Dual formulations – Toilets: Natural Sanitiser & Surfactant; Urinals: Bio-enzyme solution.

Customisable – Adjustable service duration, dosing interval, and operating schedule.

Toilets

BIO Enzyme Solution

- Breaks down organic matter
- Reduces odours
- Prevents the formation of organic scale
- Helps prevent blockages

Urinals

Natural Sanitiser & Surfactant

- Kills harmful bacteria
- Reduces odours
- Combats scale
- Helps prevent blockages

Maintain Hygiene

The **AUTOSAN** system delivers hygiene where it matters most, during the flush. It automatically injects a precise dose of solution into the cistern, ensuring consistent performance every time. Each dose works with the natural flush cycle, providing full coverage under the rim and throughout the bowl or urinal. This approach harnesses gravity and water flow for maximum cleaning power.

Both solutions are fragrance-free and colour-free, maintaining a clean, neutral environment without added scents or dyes. Packaged in 1.1L flexible pouches, the system reduces plastic waste compared to traditional rigid bottles.

Efficient & Customisable

The **AUTOSAN** operates continuously and adapts to your needs. Settings allow you to:

- Choose service duration: 30 or 60 days
- Adjust dosing intervals: every 30 min, 1 hr, or 2 hrs
- Set operating schedule: 12 or 24 hours

This flexibility ensures optimal hygiene for any washroom, regardless of footfall.

Fully Serviced

The **AUTOSAN** is a fully serviced item, with **phs** ensuring that it is always fully functioning and dispensing sanitiser into the cistern without any input from your staff.

After every service, you'll receive an immediate automated email confirmation detailing the site and products serviced. We'll provide a time-captured signature, showing exactly when your service was carried out and who acknowledged our visit, so you can be sure you've got a complete service audit trail.

Product Specification

Sizes	20.4cm x 26.5cm 9.9cm
Weight	0.8kg
Operation	Battery operated (4 x AA alkaline batteries)
Construction	Strong and durable ABS plastic construction
Installation	Suitable for use with septic tanks
Insert	Single cartridge bag

United Kingdom Registered Design No 6412677
