

Bio Crown

> The Next Generation in Waterless Urinal Hygiene.

The **new** bio-enzymatic waterless urinal cleaner from **phs** designed to clear pipes and remove odour, for good.

Featuring hygiene technology designed to tackle the toughest challenges in waterless urinal systems, **Bio Crown** delivers performance, sustainability, and cost-efficiency in one innovative product.

Unlike traditional solutions that only prevent future build-up, **Bio Crown** actively removes existing uric salt deposits and sludge from pipes. Its unique bio-enzymatic formula consumes uric salts and creates a foaming action that coats and cleans pipes.

Bio Crown eliminates odours at the source. By breaking down the food source for bacteria, it stops the cycle that causes foul smells — delivering long-lasting freshness and a cleaner washroom experience, preventing future blockages.

Designed for flexibility, **Bio Crown** fits most waterless urinal systems. Its anti-splash design and attractive colours make it practical and discreet.

Bio Crown isn't just a hygiene product — it's a commitment to a cleaner planet. Every element of its design and performance has been engineered with sustainability in mind.

Unlike traditional plastics that linger for decades, **Bio Crown** uses **rapidly biodegradable technology**. Even if it ends up in landfill, it will fully decompose within two years (vs 500 years+ for polypropylene) leaving no harmful residue. Not only that, but many urinal blocks contain carrier salts and harsh chemicals that pose risks to marine ecosystems.

Bio Crown is **free from harmful chemicals**, making it one of the most environmentally responsible solutions on the market.

The bio-enzymatic action continues working beyond the urinal, breaking down organic matter as wastewater travels to treatment plants meaning **cleaner water reaches treatment facilities**, reducing the energy and resources needed for purification — a powerful sustainability advantage.

Eco-Friendly Key Features

No harmful carrier salts or chemicals
Safe for aquatic life.

Rapidly biodegradable casing
Made of 20% recycled plastic and is 100% recyclable.

Continues cleaning beyond the urinal
Helping reduce energy use at water treatment plants.

Designed for long-lasting performance and minimal maintenance
Bio Crown reduces the need for chemical cleaners, rodding, and emergency call-outs—cutting down on transport emissions and operational impact.

Product specification

Dimensions	12 × 7 × 7 cm
Weight	84g
Scent	Available in Ocean Mist and Kiwi Grapefruit

Key features:

- Superior odour control
- Prevents drainage clogs
- Proven pipe cleaning performance
- Long lasting freshness with a universal fit and anti-splash
- Available on a 13 interval service per annum
- The surfactant block has a unique foaming action that coats the pipe throughout use preventing a build up of uric-acid - an extremely common plumbing issue in waterless urinals
- It is recommended that 1 litre of water per day is poured over the **Bio Crown** unit for maximum results
